The Journal of Heredity, 1975

Adams, B. E., *et al.*, Use of a pocket-size, programmable calculator for phenotype tallying of a three-point cross, 39.

Adams, J. N., *et al.*, Use of a pocket-size, programmable calculator for phenotype tallying of a three-point cross, 39.

Adams, Mary-Jane and F. K. Hoornbeek, Modification toward dominance of a recessive lethal in the mouse, 124.

A 14/14 marker chromosome lymphocyte clone in ataxia telangiectasia, J. M. Rary, M. A. Bender, and T. E. Kelly, 33.

Ahmad, Q. N., *et al.*, A colchicine-induced diploid from a haploid soybean twin, 327.

Allendorf, Fred W., *et al.*, Biochemical genetic variation in pink and chum salmon: Inheritance of intraspecies variation and apparent absence of interspecies introgression following massive hybridization of hatchery stocks, 227.

Animal Genetics

Asterina gibbosa: meiotic chromosomes of males, 245.

Birds: somatic chromosomes of male *Accipiter badius* 175; dominant red egg-shell color in Japanese quail, 141; sectorial mosaics in domestic pigeons, 197.

Cattle: variation in Hereford coat-color pattern, 147.

Cockroach: cytology and genetics of *T(3;12)* and *T(7;12)*, 79; genetics of pale purple, pearl, and stumpy, 155.

Drosophila: inverted gene arrangements in South Indian populations of *D. nasuta*, 89; chromosomal variation in natural populations of *D. pseudoobscura* from Central Mexico, 203; DNA homologies among *Drosophila* species and a related genus, 213; note on the distribution of the recombination fraction in *D. melanogaster*, 309; mitotic, polytene, and meiotic chromosomes of *D. ananassae*, 353; spontaneous male recombination and mutation in isogenic-derived chromosomes of *D. melanogaster*, 367.

Fish: YY male goldfish from mating estrone-induced XY female and normal male, 2; iridescent metallic blue color variant in rainbow trout, 100; biochemical genetic variation in pink and chum salmon, 227.

Fox: genetics of *W* locus and expression of its lethal effects, 331.

Fowl: chondrodystrophy, an inherited lethal condition in turkey embryos, 339; degenerative myopathy of deep pectoral muscle in turkeys, 362.

Hamster: frost coat-color mutant in Syrian golden, 102; jute, new coat-color mutation in Syrian, 246; linkage of white band and long hair in Syrian, 312.

Horse: hereditary multiple exostosis, 318.

House fly: variability studies with North Dakota, Texas, and Florida populations, 137; polymorphisms and inheritance patterns of tetrazolium oxidase and octanol dehydrogenase, 218.

Insect control: reassessment of use of chromosome inversions, 35.

Livestock: first world congress on genetics applied to production, 38.

Lobster: inheritance of allozymes in *H. americanus*, 114.

Mice: genetic variation in plasma prealbumin, 19; modification toward dominance of recessive lethal, 124; genetic variation in number of pituitary PAS-purple cells, 144; genetic analysis of cortex weight, 207; electrophoretic analysis of plasma proteins of Mississippi *Peromyscus*, 237; genetics and pathology of motheaten, an immunodeficient mutant, 250; genes associated with leukocyte production, 301; historical report on Goodale white-spotted, 376.

Mink: genetic studies of muscular dystrophy, 63.

Mosquito: effects of thiotepa on productivity of male *Aedes aegypti*, 172; genetics of two new eye color mutants in *Culex tarsalis*, 297; genetics of eye-gap and maroon-eye mutants in *Culex pipiens*, 349.

Phyllomedusa burmeisteri: a diploid population, 160.

Primate: fluorescent banding pattern of *Aotus trivirgatus* Humboldt 1812 karyotype, 247.

Rabbit: hereditary vestigial pulmonary arterial trunk and related defects, 50; genetics and pathology of new chrondrodystrophy mutant, 271.

Rat: congenic RCS strains with inherited retinal dystrophy, 242; inheritance of mitomycin C-induced structural rearrangements of chromosomes, 285.

Sheep: G-Band identification of chromosomes, 221.

Swine: G-band patterns of chromosomes, 344.

Tribolium castaneum: genetic effect on egg surface, 31.

Ansari, Helal Ansari and Dipika Kaul, Somatic chromosomes of male *Accipiter badius*, 175.

Appa Rao, S., *et al.*, Induction of nondormant mutants in black gram, 388.

Ashman, R. B., Modification of cross-sterility in maize, 5.

Asman, S. Monica, Genetics of two new eye color mutants in *Culex tarsalis*, 297.

Association of two marker loci with chromosome 1 in cotton: L^L and duplicate locus lp_1, J. E. Endrizzi and R. Stein, 75.

Baker, Robert F. and Thomas R. Mertens, Meiosis in variegated and anthocyaninless varieties of *Rhoeo*, 381.

Barnett, Maria de Fatima, *et al.*, Genetics of eye-gap and maroon-eye mutants in the mosquito, 349.

Barrow, J. R. and M. P. Dunford, Somatic crossing over as a cause of intergenome translocations in haploid cotton, 277.

Batistic, R. F., *et al.*, Further studies on polyploid amphibians: A diploid population of *Phyllomedusa burmeisteri*, 160.

Beçak, M. L., *et al.*, Further studies on polyploid amphibians: A diploid population of *Phyllomedusa burmeisteri*, 160.

Beçak, W., *et al.*, Further studies on polyploid amphibians: A diploid population of *Phyllomedusa burmeisteri*, 160.

Belaire, D. and R. J. Brown, A computer method of simulating animal breeding experiments for student learning of genetic analysis, 168.

Belyaev, D. K., *et al.*, Genetics of the *W* locus in foxes and expression of its lethal effects, 331.

Bempong, M. A. and Evelyn C. Trower, Sensitivity of rat testes to inhibitors of nucleic acid synthesis: III. Inheritance of mitomycin C-induced structural rearrangements of chromosomes, 285.

Bender, M. A., *et al.*, A 14/14 marker chromosome lymphocyte clone in ataxia telangiectasia, 33.

Bernier, P. E., *et al.*, Degenerative myopathy of the deep pectoral muscle in the domestic turkey, 362.
Bhalla, Satish C., *et al.*, Genetics of eye-gap and maroon-eye mutants in the mosquito, 349.
Biggers, Charles J. and Charles T. Peck, Electrophoretic analysis of plasma proteins of Mississippi *Peromyscus*, 237.
Biochemical genetics of lobsters (*Homarus*): II. Inheritance of allozymes in *H. americanus*, D. Hedgecock, K. Nelson, R. A. Shleser, and M. L. Tracey, 114.
Biochemical genetic variation in pink and chum salmon: Inheritance of intraspecies variation and apparent absence of interspecies introgression following massive hybridization of hatchery stocks, Bernie May, Fred M. Utter, and Fred W. Allendorf, 227.
Blumenson, Leslie E. and Theodore S. Hauschka, Litter sizes of Ha(ICR) mice: A preference for even numbers?, 119.

Peterson, J. S. and C. H. Yoon, Jute: A new coat color mutation in the Syrian hamster, 246.
Phenotypic and genetic studies of a new mutant of yellow endosperm in maize, Donald S. Robertson, 127.
Phenotypic-karyotypic localization of the human Rh-locus on chromosome 1, J. H. Turner, M. H. Crawford, and W. C. Leyshon, 97.
Pittarelli, G. W. and J. R. Stavely, Direct hybridization of *Nicotiana repanda* × *N. tabacum*, 281.

Plant Genetics

Barley: pachytene chromosomes, 165.
Black gram: induction of nondormant mutants, 388.
Citrus: triploid progenies from $2x \times 2x$ crosses of cultivars, 177; inheritance of coagulation of young shoot homogenates, 233.
Cotton: male sterility from *Gossypium harknessii*, 23; association of L^L and lp_l with chromosome 1, 75; monosomic analysis of 23 mutant loci, 163; somatic crossing over as a cause of intergenome translocations in haploids, 277.
Gloxinia: genetics of corolla traits, 10.
Incense cedar chromosomes, 41.
Maize: modified cross sterility, 5; phenotypes and gene symbols of albino and white-endosperm mutants, 67; new mutant of yellow endosperm, 127; dominant disease lesion mimics, 265; estimation of epistatic variance in Iowa stiff stalk synthetic, 290; use of male-sterile 1 gene to eliminate detasseling in production of bicolor sweet corn hybrid seed, 387.
Pea: inheritance of pod resistance to cowpea curculio infestation, 43.
Peanut: paternal inheritance of x-ray induced foliaceous stipule, 28.
Pear: dominant gene causing sensitivity to fire blight in *Pyrus*, 259.
Petunia: timing of temperature effect on microsporogenesis in cytoplasmic male-sterile, 313.
Plant variation: geographic patterns of variation in some cultivated plants, 182.
Rhoeo: meiosis in variegated and anthocyaninless varieties, 381.
Rice: inheritance of resistance to bacterial leaf blight, 384.
Sericea lespedeza: inheritance of two new plant types and early flowering, 192.
Solanum chacoense: genetic segregation of trisomics, 131.
Sorghum: genetics of sorghum improvement, 56; inheritance of purple testa, 180.
Soybean: multiple seedling development, 323; colchicine-induced diploid from haploid twin, 327.
Tobacco: direct hybridization of *Nicotiana repanda* × *N. tabacum*, 281.
Tomato: exine pattern of hybrid between *Lycopersicon esculentum* and *Solanum pennellii*, 45.
Triticale: peroxidase activity in near-isogenic height lines, 151.
Watermelon: inheritance of susceptibility to powdery mildew, 310.
Wheat: sterility of common wheat with *Aegilops triuncialis* cytoplasm, 13.

STATEMENT OF OWNERSHIP, MANAGEMENT AND CIRCULATION (Act of August 12, 1970: Section 3685, Title 39, United States Code)

1. Date of filing: October 3, 1975
2. Title of publication: THE JOURNAL OF HEREDITY
3. Frequency of issue: Bimonthly
4. Location of known office of publication: 1028 Connecticut Avenue, N.W., Washington, D.C. 20036
5. Location of headquarters or general business offices of the publisher: 1028 Connecticut Avenue, N.W., Washington, D.C. 20036
6. Names and addresses of publisher, editor, and managing editor:

Publisher: American Genetic Association, 1028 Connecticut Avenue, N.W., Washington, D.C. 20036

Editor: None

Managing Editor: Barbara C. Kuhn, 1028 Connecticut Avenue, N.W., Washington, D.C. 20036

7. Owner (If owned by a corporation, its name and address must be stated and also immediately thereunder the names and addresses of stockholders owning or holding 1 percent or more of total amount of stock. If not owned by a corporation, the names and addresses of the individual owners must be given. If owned by a partnership or other unincorporated firm, its name and address, as well as that of each individual must be given): American Genetic Association, 1028 Connecticut Avenue, N.W., Washington, D.C. 20036
8. Known bondholders, mortgages, and other security holders owning or holding 1 percent or more of total amount of bonds, mortgages or other securities: None
9. For completion by nonprofit organizations authorized to mail at special rates (Section 132.122, Postal Manual)

The purpose, function, and nonprofit status of this organization and the exempt status for federal income tax purposes have not changed during preceding 12 months.

10. Extent and nature of circulation:

A. Total no. copies printed (Net press run)	4,644*	4,093**
B. Paid circulation		
1. Sales through dealers and carriers, street vendors and counter sales	0*	0**
2. Mail subscription	4,000*	3,812**
C. Total paid circulation	4,000*	3,812**
D. Free distribution (including samples) by mail, carrier or other means	0*	0**
E. Total distribution (Sum of C and D)	4,000*	3,812**
F. Office use, left-over, unaccounted, spoiled after printing	644*	281**
G. Total (Sum of E & F—should equal net press run shown in A)	4,644*	4,093**

* Average no. copies each issue during preceding 12 months.
** Actual number of copies of single issue published nearest to filing date.

I certify that the statements made by me above are correct and complete.

BARBARA C. KUHN
